Freelance full-stack developer

Self Employed - Brampton, ON

January 2017 to Present

I really enjoy doing:

1. Object-oriented programming with Java and Typescript.
2. Creating responsive, user-friendly and visually enjoyable UIs (HTML, SASS).
3. Building modern frontend apps by using Angular.
4. Implementing backend APIs, written with PHP or preferably with NodeJS (Express & Typescript).

My Skill Set:

• Angular/Typescript/Javascript
• React.js
• Jquery
• Express js
• REST API & Third-party web API integration
• Java EE
• Web Sockets
• CSS3/SASS
• Bootstrap / Material UI
• MySQL & Mongo DB
• Git Hub
• Firebase

Node.js developer & Admissions Assistant

LOYALIST COLLEGE - Greater Toronto Area, ON
February 2020 to April 2020

Working for LOYALIST COLLEGE has been a great experience. I worked as a full time Admissions Assistant for the company where part of my duties were the following:

• Documents Verification : Verification of hundreds of documents carefully every single day and uploading it on the LOYALIST COLLEGE website.
• Microsoft Teams : Updating the Excel sheet on Microsoft Teams Every single time i make a change to make sure the rest of my colleagues are in sync while working.
• Adapting New Changes : We happened have weekly meetings where team was assigned new protocols & tasks and we were supposed to learn it such a short period of time and start executing it without wasting any time.
• Node.JS development : Company was also working on a new websites and i was assigned to design REST APIs for their site in the mean time. During the process i worked with Authentication & Authorization as well as conversion of data into pdf and CSV format.
